

AK 2 Hanging Installation Guide

DeVorm

Introduction

- Follow the instructions for a safe installation.
- Make sure that the power supply has been turned off before installing or cleaning the product.
- Pay attention to the correct colors when connecting the wires: blue (N), brown or black (L) and protection class I yellow-green (earth wire).
- Maintain interior lighting with a dry cloth or brush. Do not use alcohol or any other solvents to clean the product. Keep all electrical components dry. Make sure the power is switched off before cleaning this product.
- If the fixture is mounted on a metal surface, it must be earthed or connected to earthing from the electrical installation.

The lighting fixture has been designed, produced and tested according to European safety regulations (EN-60598 / CE). All used components are UL-registered. Changes in design and technical specifications reserved.

Design

De Vorm

About

A Workplace Divider Lamp for reading tables, shared work spaces and open offices. The large shape has its own characteristic aesthetic as well as sound dampening properties to increase the sensation of privacy.

Care & Maintenance PET Felt

Make sure that the power has been turned off before cleaning this product. It is advised to clean by dabbing the PET Felt with a damp cloth. Do not rub, it can cause damage and may cause bald spots. If this is not sufficient, stubborn stains can be removed with qualitative cleaning products like the James cleaning set.

5 Insert wall plugs and screw the ceiling mount disk into the ceiling plug

6 Insert the steel cable into the ceiling cap. Then mount the ceiling cap on the ceiling mount disk

-
- 7 Push the 2 steel cables into the cable adjusters on the lampshade and adjust them to the correct height.

-
- 8 Connect to power supply — and you're done!

We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

We like a product because of its functionality.

A good product makes life easier — by helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of its functions. That is what makes it a complete product.

We continuously raise the bar.

From the very first sketches we already start searching, combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
