1 Place table top upside down on a blanket

! Make sure to place frame e.g. on protection blanket to prevent damage.

2 Place profiles on the bottom of the table and mount them with screws

3 Insert sliding nuts

4 Mount legs on profiles

5 Mount the caps on the ends of the supporting profiles

6 *Only for aluminium feet:* Mount feet brackets on legs

7 Placement of adjustable feet

8 Turn the table with care

! Make sure to protect the edge of the table top while turning it to prevent damage.

9 Congratulations, it's done!

We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

We like a product because of its functionality.

A good product makes life easier — by helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of its functions. That is what makes it a complete product.

We continuously raise the bar.

From the very first sketches we already start searching, combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
