

CLEANING INSTRUCTIONS

Due to its porous structure, PET Felt can be easily cleaned with water. In most cases, water is sufficient to remove stains. Pour water over the stain and let it drip through. If a stain remains, it is advised to dab it with a dry cloth while PET Felt is still wet. Do not rub, as it can damage the material or cause excessive pilling. Let the surface dry naturally.

If water is not sufficient, stubborn stains can be removed with professional cleaning products like the James Cleaning set. Depending on the type of stain, the James Cleaning set provides different solutions. It is advised to try a cleaning product out on an invisible spot prior to its application on a visible area. Please, read the manufacturer's manual to choose the suitable type of treatment.

In order to remove dust, we recommend vacuuming the PET Felt occasionally.
